CAREER OBJECTIVE

Results-driven MCA student with a diverse toolkit in MERN stack and machine learning. Proven technical ability as demonstrated by a successful campus placement at TCS Ignite. Committed to delivering high-quality code in a challenging development role

WORK EXPERIENCE

Web Development • Internship

Jun 2024 - Aug 2024

Offcampuscareer, Virtual

Completed a 3-month internship in web development, contributing to the design and implementation of responsive web applications. Gained hands-on experience with HTML, CSS, JavaScript, Bootstrap, WordPress and collaborative software development in an agile team environment.

EDUCATION

Master of Computer Applications (MCA),

2024 - 2026

Amritsar Group Of Colleges, Amritsar

CGPA: 8.00/10

Bachelor of Computer Applications (BCA),

2021 - 2024

Amritsar Group Of Colleges

CGPA: 8.34/10

TRAININGS / CERTIFICATIONS

Machine Learning

Jun 2025 - Jul 2025

Sensation Solutions, Mohali

Completed a two-month Machine Learning training covering supervised/unsupervised learning, model evaluation, and practical project implementation. Restaurant Recommendation System

PORTFOLIO

PROJECTS

[Restaurant Recommendation System ↗](#)

May 2025 - Dec 2025

My Streamlit-based restaurant recommendation system uses the K-Nearest Neighbors (KNN) algorithm to suggest restaurants similar to a user's preferences, such as cuisine, budget, and other relevant features. It combines data preprocessing and feature scaling with an interactive Streamlit interface to deliver fast, personalized restaurant recommendations in a simple and user-friendly way

[PathSeeker - Affiliate marketing site ↗](#)

Aug 2024 - Dec 2024

Pathseeker was your MERN-based courses marketplace where users buy tech/digital marketing courses while earning referral bonuses for successful recommendations.

Skin Analyser

Jan 2026 - Present

DermaAI is an AI-powered skin analysis application developed using Python and Machine Learning. It utilizes a YOLOv8 model for computer vision-based skin detection and is deployed as an interactive web interface via Streamlit. The system is designed to provide automated skin assessments, leveraging supervised learning techniques to evaluate and analyze dermatological conditions effectively.
